EMMANUEL ODHIAMBO OCHIENG

Full Stack Developer

0743942353 | emmanuelonlineacc@gmail.com

github.com/emmanuelonlineacc

PROFILE

Developer focused on responsive web interfaces, e-commerce and practical business tools. Building HTML, CSS and JavaScript skills through portfolio projects, while developing PHP and MySQL foundations through guided backend practice. Interested in contributing to a team and continuing to learn through hands-on work.

TECHNICAL SKILLS & PROJECT PRACTICE

Frontend: HTML5, CSS3, responsive layouts, Flexbox, CSS Grid, media queries, JavaScript DOM events, cart interactions and accessible controls.

Backend learning: PHP classes, PDO prepared statements, MySQL table relationships, SQL queries and server-side validation through guided project work.

Tools: Git, GitHub, VS Code, browser DevTools, local project setup and README documentation.

PROJECTS

LiquorDine | E-commerce website - ongoing development

Project work involving product browsing, cart interfaces, customer ordering and admin workflows. Continuing to develop the application; M-Pesa integration remains a planned area.

Moov Cafe & Bistro | Restaurant website

Responsive restaurant experience with a full menu, selectable order items and an email-based order flow. Project walkthrough available in the portfolio.

Sales & Expense Tracker | Guided PHP/MySQL learning project

Practice with customers, products, sales and expense tables; PHP classes and PDO; server-side validation; sales totals and profit calculations; dashboard summaries, invoice output and database documentation. Skills are being developed through guided implementation.

PROFESSIONAL BACKGROUND

CTM | Survey Rider

Customer-facing experience in a tiles and ceramics business, identifying customer needs and connecting sales opportunities with in-store representatives. Transferable strengths include communication and an understanding of customer journeys.

ADDITIONAL INFORMATION

Open to developer opportunities and collaborative projects. Referees available on request.
